STUDIO LIZART

Sewing instructions infinity scarf

You will need

- 150 x 55 cm fabric
- matching thread
- sewing machine/needle and thread

Step 1

Draw a rectangle of size 145 x 50 on the fabric and cut this rectangles with seam allowance.

Step 2

Fold the rectangle lengthwise, with the right side together so only the wrong side is visible. Pin the long side on the drawn lines of the rectangle.

Step 3

Sew the long edge leaving both short edges open. Finish the seam with a zigzag stitch.

Step 4

Now you have a tube. Turn this tube halfway inside out until the short sides meet. So you get a tube with 4 layers of fabric and half the length.

Step 5

Pin the short sides round (only 2 layers attached) and sew the short sides leaving a 5 cm turning gap. Finish the seam with a zigzag stitch.

Step 6

Turn the scarf inside out through the turning gap so that the right side becomes visible. Push out the corners and smooth the seams.

Step 7

Fold the raw edges of the turning gap inside and close the turning gap by hand (with a blind stitch) or with your sewing machine.

Step 8

Finished! Ready to wear or give as a beautiful gift!

Variation tip:

Want the scarf to drape a little more playfully? Before joining the two ends in step 5, give one of them a half-turn (180 degrees). When you sew the ends together, your scarf will have a beautiful, permanent twist.
